Pooch Bins

dog waste composting trashcans

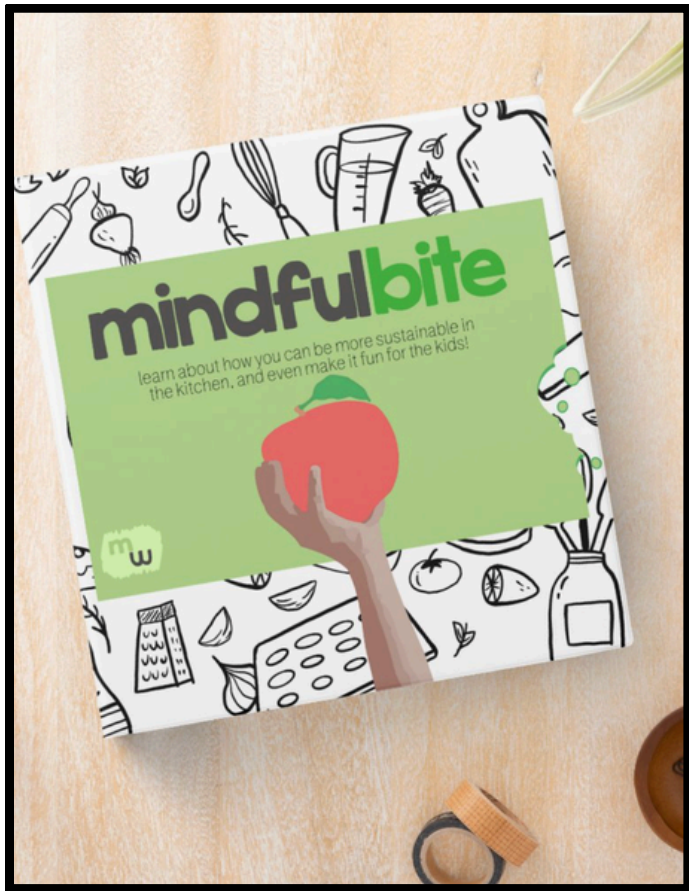

did you know that you could compost dog waste?

introducing an innovative solution for dog parks: a hot composting trash can specifically designed to minimize the amount of dog waste sent to landfills while maintaining clean and healthy green spaces.

mindfulware

sustainable cookware

this innovative cookware line, crafted from Indian hemp, offers a sustainable alternative to traditional kitchenware by reducing plastic waste while educating consumers on the benefits of a healthy, eco-friendly lifestyle.

the products are not only durable and biodegradable but also serve as a catalyst for promoting sustainable living practices.

Javaville

Dr. Seuss themed coffee set

inspired by the whimsical worlds of Dr. Seuss, this coffee set captures the playful essence of books like "The Lorax," "The Cat in the Hat," and "Oh, the Places You'll Go!"

the design extends to a vibrant beer can label, celebrating the imaginative spirit and colorful adventures characteristic of Seuss's creations.

the cook nook.....

LEGOs Harry Potter themed kitchen set for kids

transform playtime into a magical experience with this enchanting Harry Potter-themed LEGO kitchen set for children. featuring whimsical designs inspired by the wizarding world, this set encourages imaginative play and culinary creativity, letting young chefs brew up their own delicious potions and spells.

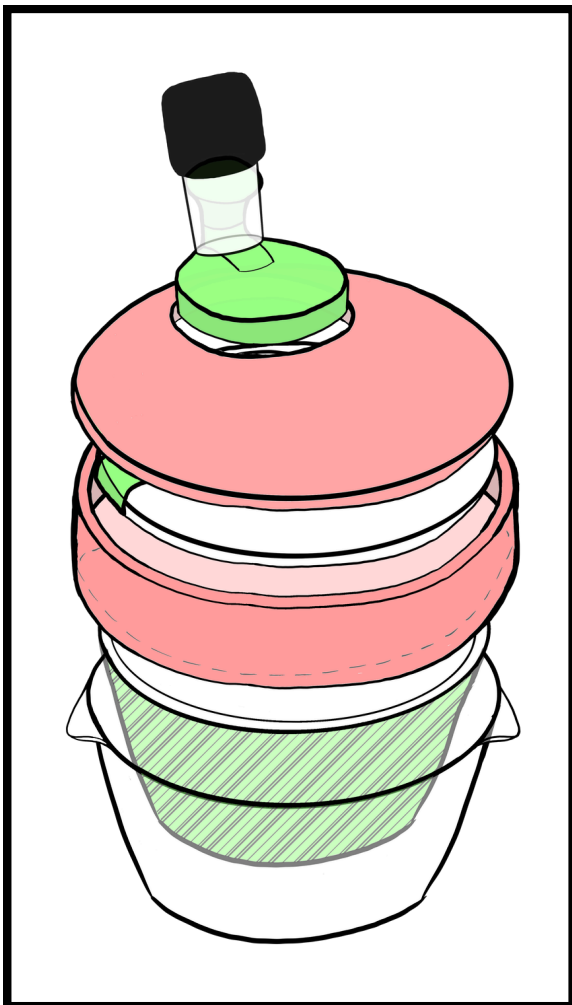

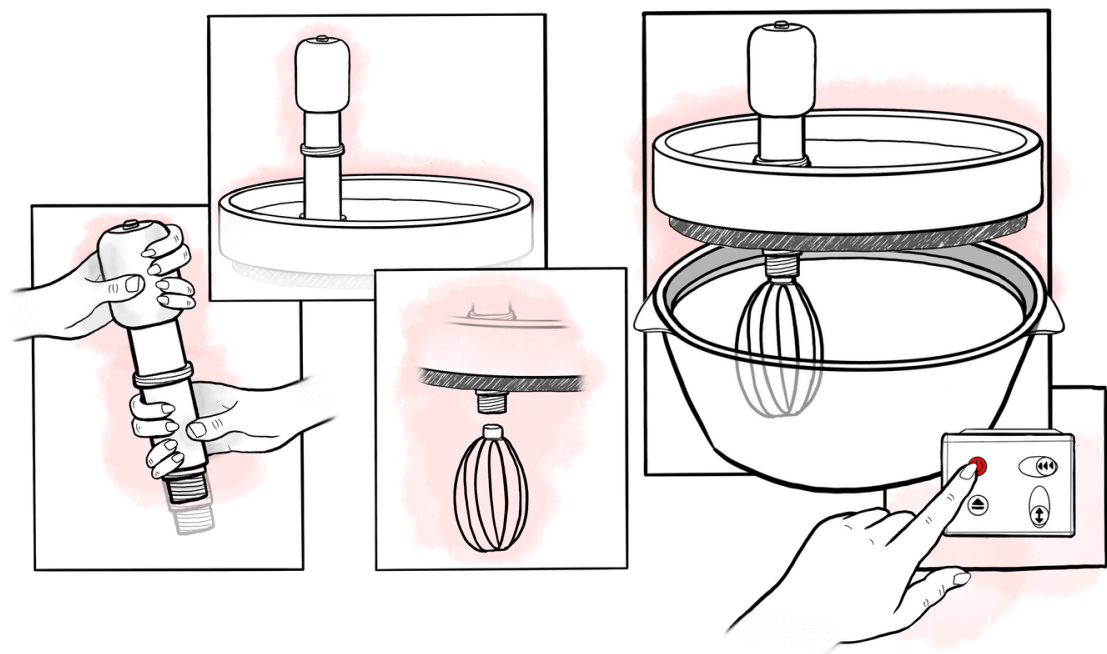

using the program ArtiosCAD, i went through several revisions of prototypes as well as creating extra pieces that bring the set to life, including kitchen products and interchangeable item doors.

KitchenAid

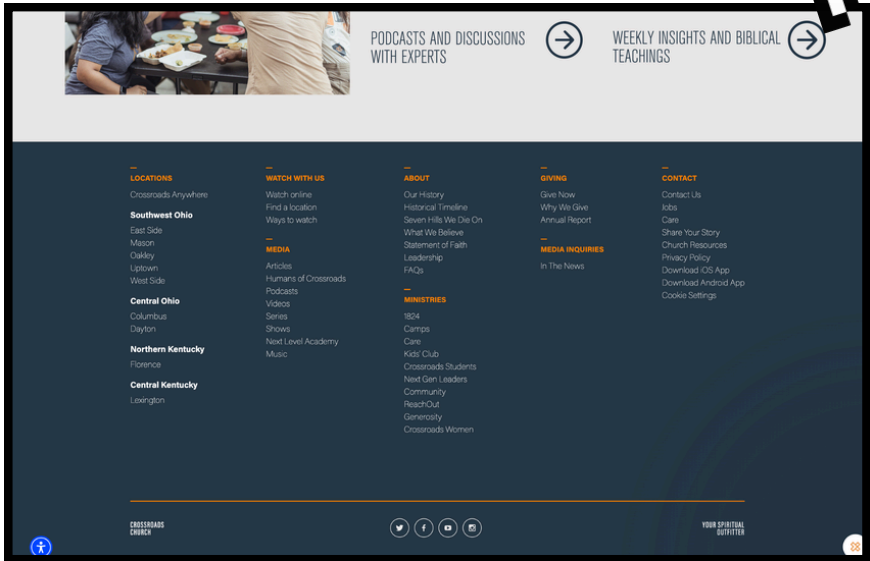

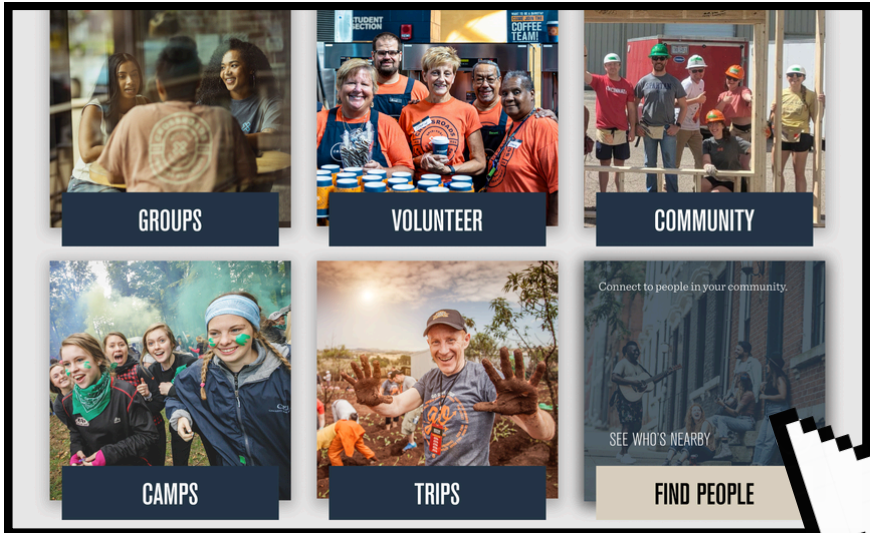

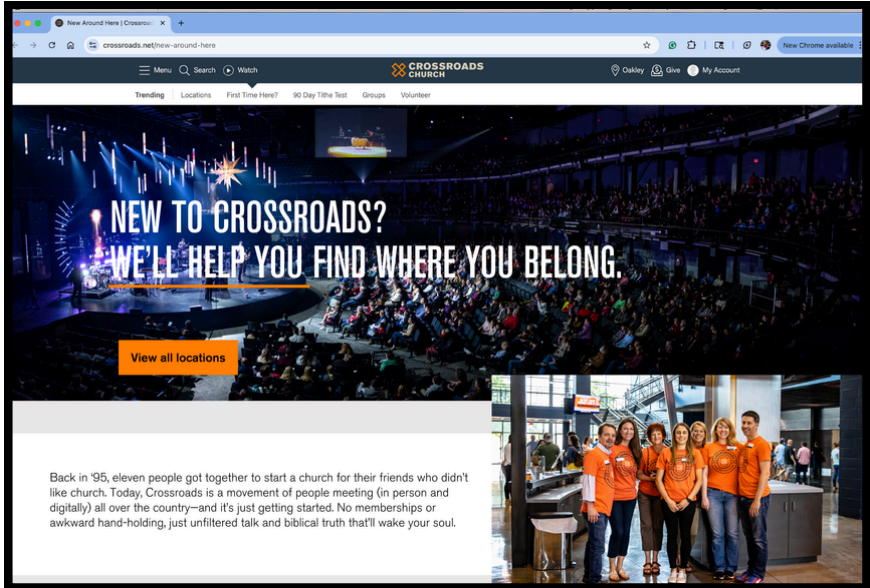

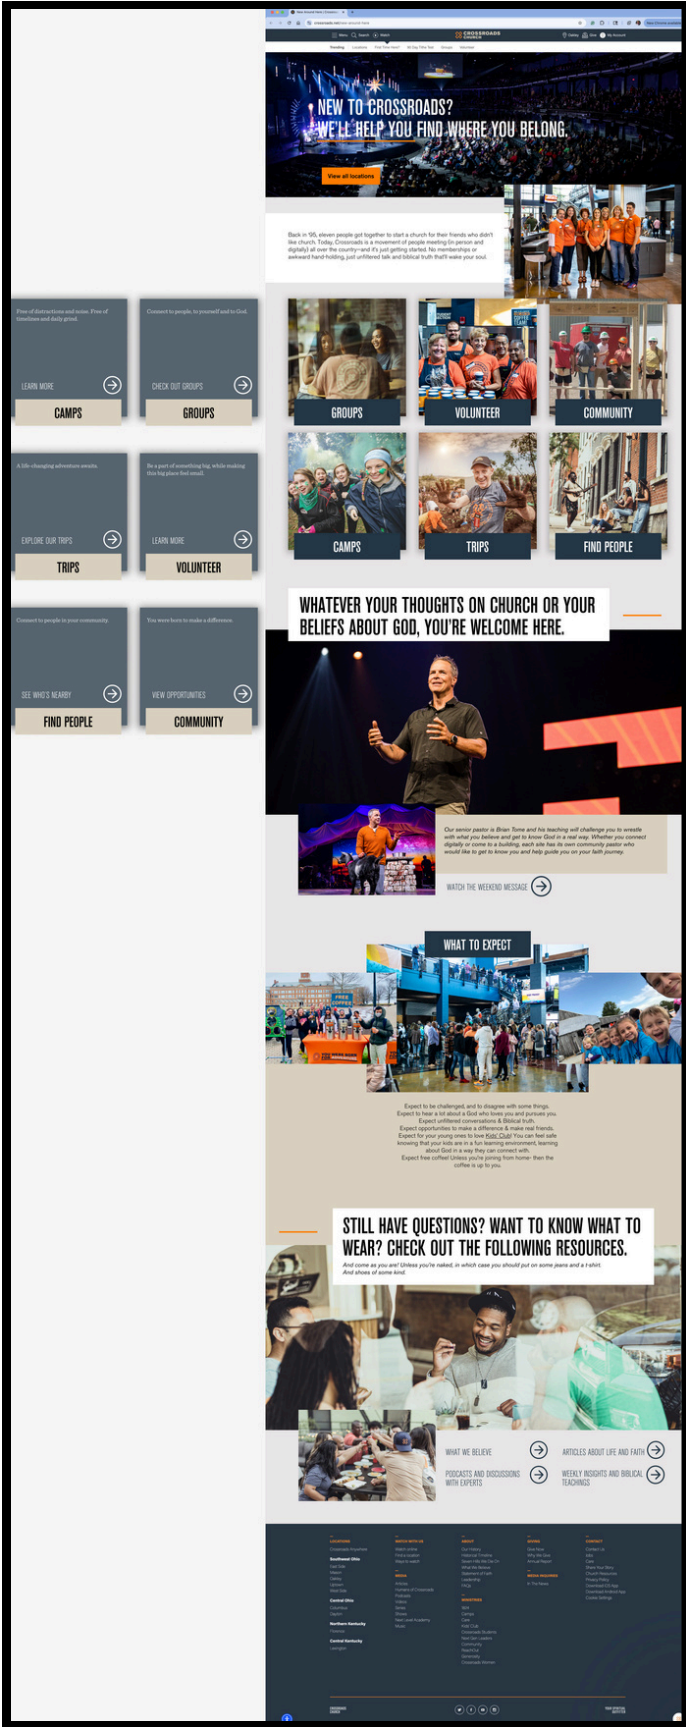

supportive tech mixing device

a natural part of aging involves muscle deterioration. most experts would agree that this muscle loss will affect everyone by the age of 75. causing people to slowly lose their independence by having to rely on others to help with the simplest tasks.

how can technology help guide people with weak motor skills through the cooking motions they can no longer easily complete?

Crossroads

church interview project

in a comprehensive interview process for a web designer position at my church. I was tasked with redesigning the "New Here" webpage.

I focused on creating an engaging and intuitive user experience, ensuring that newcomers could easily access essential information about our community. by incorporating responsive design elements and clear navigation.

candle chess set

wine label designs

this candle chess set is a fun mix of art and sustainability. turning the classic game of chess into a unique adventure. after creating a 3D-printed version and a rubber mold, I now repurpose leftover candle bits into stylish pieces. each set not only looks amazing and eco-friendly but also lets you enjoy the cozy glow of candles while plotting your next move.

OJ's Mix + freelancing

at OJ's Mix, I craft unique, sustainable creations by repurposing materials to produce a variety of beautiful, functional art that reflects my commitment to sustainability and reducing waste.

I strive to inspire others to see the potential in what might otherwise be discarded, contributing to a more sustainable future.

tumbler composter

up-cycled from a thrifted bingo cage

compost tumblers provide easy compost at a quicker pace than other methods. they create a more attractive compost than a pile. keeping out unwanted critters and pests.

when insulated, it helps the composting process generate and retain heat. preventing the compost from going dormant in cold weather and allowing for year-round composting.

dog food tray

up-cycled from a side table

do you know what gastric dilatation-volvulus (GDV) is? it's a health issue that can happen to dogs if they were to exercise within an hour after eating, causing their stomachs to bloat.

elevated bowls can reduce strain on your dog's neck & joints, making it easier on them to eat, & it may also aid in swallowing, reducing the risk of choking or irritation.
